. i already tried to restart my computer. i also tried this game in c++ and c#. I have no idea what i'm doing wrong. A: The game compiles and runs fine for me. Are you just running the executable, or are you trying to use gcj as the JVM? c:\>java -version
java version "1.6.0_27" Java(TM) SE Runtime Environment (build 1.6.0_27-b07) Java HotSpot(TM) Client VM (build 20.2-b06, mixed mode, sharing) c:\>c:\jdk1.4.2\bin\javac D:\jdk1.4.2\HelloWorld.java c:\>java
D:\jdk1.4.2\HelloWorld Hello World! c:\> I ran the following command to get started with HelloWorld:
c:\>D:\jdk1.4.2\bin\java.exe -jar D:\jdk1.4.2\HelloWorld.jar Try looking at the console output in case any error messages appear. 1. Field of the Invention The present invention relates generally to a hydraulic brake system. 2. Description of the Related Art There has been known a hydraulic brake system which comprises a master cylinder which is disposed at the front of a vehicle body, a wheel brake device disposed on one side of the vehicle body, a pressure control valve which is connected to a wheel brake device and which controls the braking pressure supplied to the wheel brake device, and a pressure control valve device which controls a delivery flow rate of a pressure fluid which flows out from the master cylinder when an operator performs an operation which requires a brake, and which controls a delivery flow rate of the pressure fluid which flows in from the wheel brake device to the master cylinder when the operator performs an operation which does not require a brake, and which is disposed in the vicinity of the wheel brake device. This hydraulic brake system is applied to an electric brake system which comprises an electric actuator (which is referred to as a xe2x80x9cbrake pedalxe2x80x9d) which performs an operation which requires a brake, and which causes a wheel brake device to 82157476af
